

The document output management solution that ensures complete print security

A unique combination of Ringdale® leading-edge connectivity expertise and OKI® printing technologies

For years, secure printing has been a goal of organizations large and small. The challenge has been to control access to confidential documents in a convenient, cost-effective way.

FollowMe® printing technology from Ringdale® provides a complete, no-hassle solution to secure document output management.

FollowMe can be deployed with both single- and multifunction printers (MFPs) connected to the network through a wide range of authentication devices, such as proximity cards, fingerprint readers or personal Identification numbers.

For printers, the FollowMe external controller and applicable authentication device are utilized to securely route print jobs to the appropriate user.

Embedded FollowMe technology is available with the MB700 MFP Series from OKI Printing Solutions. This provides a completely integrated process for enabling secure document output management and accounting.

With the embedded solution, all MFP functions—including copying, e-mailing, faxing, printing and scanning—can be centrally managed from the FollowMe management console and are accessible from any web browser.

User access can be controlled in a number of ways, including restrictions placed on color output, number of pages printed, duplex versus simplex, or selection of paper size.

Both the external and embedded configurations have extensive cost and usage reporting capabilities to help you identify and correct printing waste and mismanagement.

Inside the organization, FollowMe helps divisions or departments of any size to optimize their output devices and reduce the costs associated with paper and toner usage.

Especially within organizations supporting hundreds—even thousands—of users and cost centers, document printing-and-copying accountability and cost recovery are rapidly becoming mandatory. This is especially evident in universities and corporate offices, and particularly in law firms and financial and insurance institutions.

In all of these settings, FollowMe printing technology provides a complete solution for allocating printing costs and managing print and copy assets.

The advantages of FollowMe from Ringdale®

BEFORE FollowMe	WITH FollowMe	ADVANTAGE
High overall cost associated with printing: equipment, consumables, waste and maintenance	Global or user-specific policies and procedures restrict users, redirect printing to another device, or force use of black & white	Average cost savings between 20% and 30%
Complexity of managing a mixed fleet of printing-device brands and types	FollowMe printing technology works with printers/MFPs from OKI Printing Solutions and other printer/MFP brands	Successfully manage your entire print-and-copy fleet through a single robust application
