

OKI® MICROLINE® 390/391 Turbo

24-Pin Impact Printers

Powerful performance and smooth handling

Highlights:

10,000-hr. MTBF – tested to run over 60% longer than its competitors

390 characters-per-second print speed – 30% faster than closest competitor

Expanded head gap handles forms up to twice as thick as the competition's printers

Crisp, clear printing – even on 4-part forms

Windows NT® 4.0, Windows® 2000, 98, 95, and 3.1x compatible

Co-resident Epson®, IBM® and MICROLINE emulations

Networkable via optional Ethernet external print server

Zero-form tear with paper park and auto-form advance

Eight resident scalable barcodes and seven text fonts

Rugged design for years of heavy use

Wide-carriage width available with ML391 Turbo

1-year limited warranty, including parts, labor and printhead

Toll-free, 7-day/24-hour Customer Support Hotline: 800-OKI-DATA (800-654-3282)¹

¹ Available in the U.S. and Canada only.

² Requires optional push tractor

Reliable forms printing for increased productivity in general office and utility applications.

On the fast track of impact printers, the MICROLINE® 390/391 Turbo is in the passing lane. Its Tank-Tough® endurance in the OKI® tradition will keep you productive long after most of the other printers in its class have retired. And its combination of versatile paper handling, performance and speed can't be matched.

Whether it's called on to handle long print runs or a single piece of letterhead, an envelope or a spreadsheet, in the office or on a counter, the ML390/391 Turbo is the way to go. This 24-pin dynamo excels in dedicated forms printing, turning it out equally fast and precise with pin feed or cut sheet stock.

In time trials, the ML390/391 Turbo clocks speeds up to 30% faster than its closest competitor —

with a Utility mode that can kick out reports at an impressive 390 characters per second. Even the Letter Quality mode is 30% faster than the competition!

The ML390/391 Turbo printhead's lightweight samarium cobalt magnet and powerful, spring-activated pins deliver a stronger punch, and the expandable gap between the printhead and platen easily seats 4-part forms. In fact, it can accept stock that's up to twice the thickness its nearest competitor can accommodate. For stiff card stock or labels, its bottom feed² provides a short, straight paper path to keep even the most difficult jobs running smoothly.
