## Oki Data Introduces Color Signage Solution for On-Demand, In-Store Printing

Oki Data Americas introduces its Color Signage Solution that enables retail customers to produce professional-quality signage and materials in-store. The solution combines Oki Data's software applications, signage media and digital color printers. The solution is based on the OKI C9300dxn and C9500dxn digital color printers, which provide up to 1200 x 1200 dpi resolution and are developed with Single Pass Color and Digital LED technology, to enhance productivity and reliability levels.
