

Remote monitoring and configuration
solution from OKI®

Enterprise Edition
Professional Edition

PrintSuperVision is an easy way for businesses – large and small – to proactively monitor and manage their document imaging devices.

Highlights:

- Available in Professional and Enterprise editions
- Proactively manage OKI® printers/MFPs and most compatible devices from other manufacturers:
 - Monitor supply status
 - Automatically send alerts
 - Configure OKI devices remotely¹
- Easy to set up, easy to learn
- Use standard Web browsers to view device status
- View usage reports on-screen or export to Excel® or CSV formats
- Schedule reports and generate automated e-mail delivery
- Order supplies online from preferred e-commerce sites

PrintSuperVision (PSV) is OKI's device configuration and monitoring software, now available in two distinct editions to better meet the needs of today's organizations. For small and medium-size businesses, there's *PSV Professional Edition*, designed with simplicity in mind. Its easy-to-use interface is accessible from any network-connected device capable of running a browser—which makes it accessible from virtually anywhere.

Configured as a server, PSV Professional monitors a device's health, sends e-mail alerts, reports supply status and consumable levels, tracks printed pages, and even lets you order supplies online—all with just a few mouse clicks.

A single-user option within PSV Professional can be installed in a non-server configuration on compatible Windows® desktops or laptops. This simple alternative checks supply levels, generates usage reports and speeds the online ordering process.

Support for several thousand print, copy and multifunction devices. For larger companies, school districts, law firms, healthcare institutions and the like there's *PSV Enterprise Edition*. Designed to support OKI and non-OKI network-compatible devices, PSV Enterprise enables help desks and IT staff to more productively manage a fleet of print-and-copy devices.

PSV Enterprise leverages the strengths of the Professional Edition and is packed with additional time-saving functionality. The "Near Me" feature allows you to quickly obtain the status of devices located within close proximity of your client PC—with no configuration needed. The "Supplies Usage" report predicts when consumables need to be replaced. And, with just a few clicks, you can order supplies from your favorite web site.

You can even import images of floor plans or geographical maps and pinpoint the location of any device through a "Map" view—complete with interactive icons displaying device status.

Accommodating the way you do business. Both PrintSuperVision editions are a snap to use. Their Microsoft®-based design provides familiar browser navigation and the flexibility to customize the user interface to your preferences.

Usage reports with striking graphs and charts can be generated with just a few clicks. And, for more detailed management reports, both PSV editions enable you to export data as text, CSV, XML and Microsoft Excel files.

When it comes to making the most of your time, PrintSuperVision from OKI is an effective tool to manage your demanding IT environment.

¹ Works only with current OKI-branded Digital Color printers; not backward compatible. Contact your authorized OKI reseller for a complete list.

PrintSuperVision is robust, flexible and scalable – providing increased productivity and a better bottom line.

Put the wide-ranging benefits of PrintSuperVision to work for your business:

Time and Cost Savings

- Manage printer usage/cost
- Minimize user intervention through proactive reporting of supplies usage
- Minimize printer downtime with fast alert notification
- Minimize resources assigned to support print devices

Flexibility

- Select the edition that's right for your needs
- Customize the user interface, reports and alerts
- Assign access rights: Administrator, Standard User or Guest
- Generate reports from templates or export data in CSV, XML, HTML and Microsoft® Excel® formats
- Order supplies from any website

Ease of Use

- Single-user option available with no server installation or configuration
- Access from any network-connected, browser-capable device
- Easy navigation via familiar browser Interface
- Supplies and consumables levels displayed graphically and in color
- Easily identifiable status icons
- Quickly locate devices in Map/Floor Plan view
- Automated alerts via e-mail
- Scheduled reports delivered via e-mail
- View and print reports in a variety of formats, directly from application

PrintSuperVision enables you to effortlessly locate, configure, monitor and maintain your printers and MFPs – enterprise-wide.

The screenshot displays the PrintSuperVision interface with a navigation menu at the top (PRINTERS | SERVICES | REPORTS | TOOLS | OPTIONS | HELP). The main content area shows a list of printers with columns for Tray, Paper Size, Media Type, Media Weight, and Capacity. Below this is a 'Supplies' section with a bar chart showing the percentage of remaining supplies for Cyan, Magenta, Yellow, and Black toners and drums. A printer image is shown on the right. At the bottom, there is a 'Printer Details' section with fields for Model, ID, Address, Vendor, Location, Name, Location, Contact, Online Status, Printing Status, Device Status, MFP Type, Manufacturer, Printer Asset Number, Printer Serial Number, and Printer MFG Address.

Status at a glance. PrintSuperVision lets you identify device configurations and capabilities in one comprehensive screen—which also includes easy-to-identify, color-coded supply levels and operational status, displayed in real-time.

The screenshot shows the 'Printed Pages Report' interface. It includes a 'Selected Date Range' of 10/1/2008 - 10/30/2008 and a 'Select chart type' dropdown set to 'Column Chart'. A bar chart displays 'Pages Printed per Day' from 10/1/2008 to 10/29/2008. Below the chart is a table with columns for Address, Location, Printer ID, Control Panel, Model, Contact, IP Address, and daily print volume from 10/13/2008 to 10/22/2008.

Address	Location	Printer ID	Control Panel	Model	Contact	IP Address	10/13/2008	10/14/2008	10/15/2008	10/16/2008	10/17/2008	10/20/2008	10/21/2008	10/22/2008
000.00.00.00		00	Ready	HP LaserJet 4000 Series	Acman	000.00.00.00	0	0	1	0	12	7	0	2
000.00.00.00		00	Power Save/Ready	86500		000.00.00.00	0	0	0	0	6	0	26	40
000.00.00.00		00	ONLINE (POWER SAVE)	C3550 MFP		000.00.00.00	1	3	42	8	20	0	0	0
000.00.00.00		00		Lenmark 3544E 792CTDF LC2-PC-PS076		000.00.00.00	13	2	4	4	3	0	0	0

Keep an eye on printed page volume. PrintSuperVision's Printed Pages Report quickly displays print volumes for one or several devices at a time. Create graphs and print results right from the application, or export data in a variety of formats.

The screenshot shows two views of device location: a geographic map of the United States and Canada with city markers, and a floor plan of a building with printer icons placed on various levels and rooms.

Keep your device locations in plain sight. To make finding and identifying devices easy, PrintSuperVision allows you to import floor plans, site maps or geographic maps, and place interactive icons where your devices are actually located.

The screenshot displays the 'Supplies Usage' report for printer C9650, OKI-C9650-1B4E71. It shows the printer's location, control panel, model, and contact. Below this is a table with columns for Remaining Toner, % Remaining, Change by Date, Days Remaining, and Order. The table lists Cyan, Magenta, Yellow, and Black toner levels, as well as Drum Life Remaining.

Remaining Toner	% Remaining	Change by Date	Days Remaining	Order
Cyan	30%	9/8/2008	13	<input type="checkbox"/>
Magenta	30%	9/8/2008	13	<input type="checkbox"/>
Yellow	60%	9/26/2008	30	<input type="checkbox"/>
Black	20%	8/29/2008	2	<input type="checkbox"/>
Drum Life Remaining				
Cyan	95%	> 90 Days	90+	<input type="checkbox"/>
Magenta	95%	> 90 Days	90+	<input type="checkbox"/>
Yellow	95%	> 90 Days	90+	<input type="checkbox"/>
Black	95%	> 90 Days	90+	<input type="checkbox"/>
Transfer Belt and Fuser Life Remaining				
Belt	95%	> 90 Days	90+	<input type="checkbox"/>
Fuser	95%	> 90 Days	90+	<input type="checkbox"/>

Maximize uptime, minimize service calls. PrintSuperVision's Supplies Usage Report predicts consumables "change by dates" to help you better plan your supplies purchases. Order supplies online from the website of your choice with just a few mouse clicks.

PrintSuperVision

Feature Summary

Feature/Functionality	Professional Edition	Enterprise Edition
Enterprise SQL Integration	No	Yes
Configure OKI Devices	No	Yes
3rd Party S/W Integration	No	Yes
Group Configuration	No	Yes
Enhanced Reporting		
• Toner Changes report	No	Yes
• Color/Mono Pages Report	No	Yes
Maps	Yes	Yes
User Defined Attributes	Yes	Yes
Parallel Communication		
• Faster Device Discovery	Yes	Yes
“Easy Setup” Option	Yes	No
Monitors USB-Connected Devices	No	Yes

Specifications

Description

Browser-based network print/copy device management utility, available exclusively from OKI Printing Solutions

Enterprise Edition and Professional Edition available as free download (www.okiprintingsolutions.com/us)

Supports all current OKI Printing Solution print/copy devices (except Label Printers) and compatible non-OKI devices

System Requirements

Windows® 7, Vista®, XP (32/64 bit), 2008/R2 Servers, 2003

Free disk space: 200 MB

Memory: 256 MB RAM (1 GB recommended)

Web browsers supported: IE 6.0 or later; Firefox™ 1.5 or later; Netscape® 8.0 or later; Opera 8.5 or later

Device Management

At-a-glance consumables levels and device status

Remote management via Web browser; access to devices' embedded Web servers

Map and Floor Plan views with interactive status icons

“Near Me” quick access to devices located close by

Customizable alerts with e-mail delivery

Online supplies ordering

Reporting Features

Supplies Usage Report displays toner levels, and remaining drum, fuser and belt life

“Change by date” predicts consumables replacement dates

Printed Pages Report displays pages printed per hour, day, week and month

Color/Mono Pages Report displays the number of color and mono pages printed per day

Toner Changes Report displays the number of times the toner cartridge has been replaced
